

**Amendments to the Specification:**

At page 1, after the Title of the Invention, please insert the following heading:

Background of the Invention

At page 1, before first paragraph, please insert the following heading:

Field of the Invention

At page 1, before the second paragraph, please insert the following heading:

Description of Related Art

Page 1, replace the paragraph spanning pages 1 and 2 with the following:

~~DE 100 436 A1~~ DE 100 51 436 A1 discloses a multipart convertible top for a convertible vehicle, where the convertible top has a gasket apparatus with a movably mounted gasket for sealing a movable roof part with respect to an adjacent vehicle part, where the gasket is pivotably mounted with respect to the movable roof part and is pivoted into its sealing position in relation to the roof part when the movable roof part assumes a sealing position, and is pivoted into a storage position when the movable roof part is moved into a position without a sealing function. In particular, the movable roof part is a rear-end roof part which can be stored horizontally in the opposite direction in a storage space in the rear end of the vehicle under a front roof part when the top is down, in which case the gasket arranged on the side of the rear-end roof part for a side window is pivotable inward with respect to the rear-end roof part when the latter is

stored. The gasket is pivotable in the direction of the middle of the vehicle such that the rear-end roof part and the front-end roof part can be positioned closely one on top of the other, so the height of the storage space can be reduced by approximately the size of the gasket.

At page 2, before the paragraph spanning pages 2 and 3, please insert the following heading:

Summary of the Invention

At page 7, before the first full paragraph, please insert the following heading:

Brief Description of the Drawings

At page 9, before the paragraph spanning pages 9 and 10, please insert the following heading:

Detailed Description of the Invention
